Providers with a Banner Health Network Logo

The Banner Health Network (BHN) logo allows for easy identification of those providers directly contracted with Banner Health Network at the specific location. As a member, when you choose to seek care from a BHN provider, you will benefit from a unique experience by working with a provider that is part of a clinically integrated network.

You will have:

- Access to BHN's high-quality, integrated network of doctors, health centers, clinics, and hospitals.
- BHN providers who work collaboratively and share what they've learned to ensure patient satisfaction and improve health outcomes
- Access to the MyBanner patient portal through Aetna's secure member site.

When searching for a provider, note that the provider may display multiple times in the results list with and without the Banner Health Network logo. When you do not see the BHN logo next to the provider, this means at that specific location, the provider is not directly contracted with BHN. You may still seek care with the provider at this location and benefits will be determined according to your plan. **Refer to your plan documents. You will find a complete description and your terms of coverage there.**
